Warehouse space at the Ulm North Logistics Centre

ABOUT US

The Seifert Logistics Group has evolved from a regional market leader into an internationally operating transport and contract logistics service provider. Founded in 1947, this family-owned company, headquartered in Ulm, is one of Germany's leading logistics service providers, employing more than 3,500 people. Across more than 45 sites in Europe, the Seifert Logistics Group implements innovative procurement, production and distribution solutions for the automotive, building materials, chemicals, consumer goods, paper and pharmaceutical sectors across over 1 million square metres. In the tarpaulin and silo sectors, more than 300,000 kilometres are covered every day.

STORAGE AREAS ALONG THE A8 & A7 AND A CONTAINER TERMINAL

A8 / A7
Direct motorway connection

Container terminal

100.000 m²
Pallet storage spaces and block storage

ULM NORTH LOGISTICS CENTRE

The multifunctional Seifert Logistics Centre is situated in the northern district of Ulm in a convenient location directly on the A7 and A8 motorways between Stuttgart and Munich and is easily accessible via its own exit. Five hall sections were built in two construction phases across an area of 30,000–50,000 square metres. All halls can be used as block storage or high-bay warehouses. The hall areas are accessible via ramps and ground-level doors. With a clear height of 14.5 metres and a floor load capacity of 7.5 tonnes, the logistics spaces can be used flexibly. In addition to the storage space, we also provide the equipment and personnel for a wide range of logistics services.

SLG SITES
across Europe

PROPERTY OVERVIEW
